

getFramme

```
graph LR; A[getFramme] --> B[byteTabToByte]
```

A diagram showing a call from the function `getFramme` to the function `byteTabToByte`. The `getFramme` box is shaded gray, and the `byteTabToByte` box is white. A blue arrow points from the right side of the `getFramme` box to the left side of the `byteTabToByte` box.

byteTabToByte
